

Rendez-Vous Génome Québec 2015

The Future of "omics" Applications

"Omics" technologies have opened the doors to a wide range of research topics and applications. This *Rendez-Vous* is intended for scientists interested in technologies and applications related to high-throughput "omics" technologies. The *Rendez-Vous* Génome Québec 2015 will focus on researchers leading initiatives using next-generation "omics" technologies in very diverse areas of research.

Topics covered will include: Forestry, microbial genomics and non-coding RNAs.

Keynote Speaker:
Pr. Jean Bousquet, Ph.D.

Professeur titulaire et directeur
Faculté de foresterie, de géographie et de géomatique
Université Laval, Québec, Canada

"Spruce genomics: out of the woods toward operational applications"

October 14th 2015

This event will take place at the Pavillon de Recherche Appliquée sur le Cancer (PRAC),
Local Z8-1006, [3201 rue Jean-Mignault, Sherbrooke](http://www.usherbrooke.ca/3201-rue-jean-mignault)

Registration starts NOW and will end on October 7th 2015. Places are limited!
To register online please go to the [Innovation Centre web page](#) and follow the links.

The *Rendez-Vous* will be followed by a hands-on Bioinformatics Workshop:
[USING GENAP AND GALAXY FOR GENOMICS ANALYSES](#)

Registration for the Workshop starts NOW. Places are limited! [Register here](#)

Talks and workshops will be given in English.
Registration, lunch and refreshments are free.
